## IF IT'S SELLEYS IT WORKS"

## ArmourFlex ${ }^{\text {TM }}$

(White, Grey, Black)

## Description

Selleys ArmourFlex ${ }^{\text {TM }}$ High Performance SMP Adhesive/Sealant Range provides superior strength and greater flexibility than conventional polyurethane sealants.

## Product Information

| Packaging | Size |
| :--- | :--- |
| Cartridge | 465 g |
| Sausage | 600 mL |

## Uses

Armourflex can be used as a joint sealant and multipurpose adhesive.

Joint Sealant: Can be used for vertical and horizontal joints on most indoor and outdoor surfaces. Suitable for use in trafficable joints.

Multipurpose adhesive: Suitable for bonding most building materials including timber, brick, concrete, tiles, metals and most plastics.

## Technical Features

- $\quad$ Superior strength \& instant grab
- No primer required
- Trafficable
- Adhesion to wet surfaces
- Fast curing
- Non-bubbling
- Better extrudability $\left(>5^{\circ} \mathrm{C}\right)$
- Long lasting flexibility
- Better curing $\left(>5^{\circ} \mathrm{C}\right)$
- No slump
- Paintable
- Low VOC

| Property | Typical result |
| :---: | :---: |
| Appearance | Thixotropic paste |
| Colour | White, Grey, Black |
| Technology | Moisture curing silylmodified polymer (SMP) |
| Shelf Life | +12 Months when stored unopened, in dry and cool conditions (below $30^{\circ} \mathrm{C}$ ) |
| Application Temperature | 5 to $35^{\circ} \mathrm{C}$ |
| Service Temperature | 0 to $70^{\circ} \mathrm{C}$ |
| Shore A Hardness (DIN 53505) | $40 \pm 5$ |
| Elastic Modulus at 50\% <br> Elongation (DIN 53504) | $0.70 \pm 0.05 \mathrm{MPa}$ |
| Tensile Strength at Break (DIN 53504) | Approx. 1.4 MPa |
| Elongation at Break (DIN 53504) | > 200\% |
| Movement Capability (ISO9046 modified) | $\pm 20 \%$ |
| Skin Time ( $23^{\circ} \mathrm{C}, 50 \%$ R.H.) | 15 to 30 min |
| Tooling Time $\left(23^{\circ} \mathrm{C}, 50 \%\right.$ R.H.) | Approx. 15min |
| Cure rate ( $23^{\circ} \mathrm{C}, 50 \%$ R.H.) | Approx $3.0 \mathrm{~mm} / 24 \mathrm{hr}$ |
| Sag/Slump | Omm |
| Indicative data only, not intended for preparation of specifications |  |

## Approvals/Standards

Meets GBCA VOC limits for general purpose and architectural sealants

[^0]
## ArmourFlex ${ }^{\text {TM }}$

(White, Grey, Black)

## Coverage

| Joint Size (mm) | Metres per <br> cartridge | Metres per <br> sausage |
| :---: | :---: | :---: |
| $\mathbf{6 \times 6}$ | 7.9 | 16.7 |
| $\mathbf{8 \times 8}$ | 4.5 | 9.4 |
| $\mathbf{1 0 \times 1 0}$ | 2.9 | 6.0 |
| $\mathbf{1 2 \times 1 2}$ | 2.0 | 4.2 |
| $\mathbf{1 5 \times 7 . 5}$ | 2.5 | 5.3 |
| $\mathbf{2 0 \times 1 0}$ | 1.4 | 3.0 |
| $\mathbf{3 0 \times 1 5}$ | 0.6 | 1.3 |
| $\mathbf{4 0 \times 2 0}$ | 0.4 | 0.8 |

## How To Use

Surface Preparation: Ensure surfaces are clean and free of oil, grease or loose particles.

Porous surfaces should be prepared by grinding, brushing, wiping with a cloth or blowing off with oil-free compressed air. Any laitance should be removed from concrete-based surfaces.

Non-porous surfaces should be free of scale, rust or oxides. They can be degreased with a solvent such as MEK, acetone or mineral turpentine. Some degreasing solvents may leave a residue that should be removed.

To achieve neat joint use masking tape on both sides of the joint and remove tape before product skinning

Joint Design: Refer to below section.
Cartridge: Cut tip and attach nozzle. Insert into caulking gun. Cut nozzle to size required for joint.

Sausage: Cut end and slide into sausage gun. Attach nozzle to gun and cut to the required size.

Tooling: Use a soapy solution before skin formation.

Painting: Paintable with water-based paints after product skins. Allow longer times before painting in colder weather. Solventbased paints may be used after first painting with a water-basedpaint. Due to the large number of paints and varnishes available, a preliminary test of compatibility is recommended.

## Joint design

Joint widths should be between 6 and 40 mm .

$$
\frac{\text { width }}{\text { depth }}=1 \quad \text { For joints up to } 13 \mathrm{~mm} \text {, the ratio of }
$$

width to depth should be 1:1.
$\frac{\text { width }}{\text { depth }}=2 \quad \begin{aligned} & \text { For joints greater than } 13 \mathrm{~mm}, \text { the } \\ & \text { ratio of width to depth should 2:1 }\end{aligned}$

A tight fitting non-absorbent, non-adhering backing material should be used to ensure the correct dimensions and prevent three-surface adhesion. Suitable materials include open cell polyethylene foam backer rod or bond-breaking tape.

## Clean Up

Uncured product can be removed with mineral turpentine. Cured product can be removed with Selleys Silicone Remover or by mechanical action.

## Handy Hints

In dry conditions, surfaces can be misted with water to speed up cure.

## Limitations

Not for permanent water immersion or below water-line use
Not suitable for use on polyethylene, polypropylene or Teflon.

## Warnings, First Aid and Shipping Information
