## Technical Details

Property	Typical Result
<b>Technology</b>	Cyanoacrylate
<b>Colour</b>	Dries Clear
<b>Set Time</b>	10 seconds
<b>Initial Cure Time</b>	30 minutes
<b>Full Cure Time</b>	~ 12 hours
Indicative data only, not intended for preparation of specifications	

## Surface Preparation

Ensure surfaces to be bonded are clean, dry, free of dust and close fitting.

## Directions for Use

1. Pierce seal at end of tube by attaching nozzle with cap and turning clockwise.
2. Remove cap and apply a small amount of glue to one surface. Bring surfaces together and apply slight pressure.

3. Wipe tip of tube, replace cap and store upright in a dry, cool place.
4. Sufficient bond strength for practical use is achieved after 30 minutes. Bond will strengthen over 12 hours.

## Storage

- Store in a dry, cool place

## Note

\*Test in an inconspicuous area for compatibility with leather.

## Limitations

- \*Not for polyethylene or polypropylene plastics
- Not for glass
- May cause some leather to discolour or harden.

## Safety Directions

**WARNING: Glue will bond skin and eyes on contact. Keep out of reach of children.**

- Avoid contact with skin and eyes.
- Avoid breathing vapour.
- If fingers stick together, apply solvents such as acetone to contact areas then wash off with water.
- Do not use solvents near eye or on open wounds.
- In case of eye contact, immediately flush with water for at least 15 minutes and seek medical attention.
- If medical advice is needed, have container or label at hand. Refer to the Safety Data Sheet.
- Keep card for reference.
